

STEEL AND BLACK FREESTANDING BIO FIREPLACE

BIO-20-272

This elegant and simple freestanding bio fireplace from ScandiFlames can be used both indoors and outdoors. With safety glass on the front and back, it ensures maximum visibility of the flames while still being enclosed. The black colour accentuates the beautiful colours of the flames and fits perfectly into the modern home. The burner has a capacity of 1.5 litres, which gives a burn time of up to 6 hours. With a bio fireplace, you can enjoy the cosiness of a fireplace without the hassle of a traditional fireplace and avoid smoke and soot.
